

Abstract of the Disclosure

A program guide system is provided in which interactive television program guide advertisement usage is monitored. Advertisement usage may be  
5 monitored by monitoring when advertisements are transmitted from a television distribution facility to user television equipment. Advertisement usage information may also be monitored by monitoring when advertisements are received by the user television  
10 equipment. Advertisement usage information may also be monitored at the time at which advertisements are displayed by a program guide. Less important data may be filtered from the collected advertisement usage data. Other activities that may be monitored include  
15 the viewing activities of the user, which program guide screens are displayed, and which non-program-guide applications are used. Real-time ratings information (e.g., real-time ratings of the popularity of certain television programs, video games, or other  
20 applications) may be provided to users in real time.
